2-MOTOR HANDSET

Leggett & Platt®

The Twin Motor Lift Mechanism offers superior safety and durability, featuring a spring-loaded footrest, heavy-gauge construction, and maintenance-free metal bushings at critical joints. Its separately-located power supply delivers only low voltage to the chair, enhancing safety. A battery backup ensures the recliner returns to the upright position during power outages. The electrical system includes thermal overload protection and is maintenance-free. For added convenience, the handset is designed to be spill-resistant, making it ideal for everyday use.
